Research Achievements 2019

Faculty of Business, Economics and Statistics

This report includes all our research achievements of the calendar year 2019

CONTENT

- 03 Our Research Themes
- 04 Publications
- 17 Editorial Work
- 20 Externally Funded Research Projects
- 29 Dissemination of Research
- 61 Citation-Based Ranking

Our Research Themes

The faculty has developed five research themes that overcome the limitations of disciplines and bring together ideas and projects from different fields.

Changing Markets and Institutions (CMI)

Transaction costs – costs caused by the exchange of goods and services in economic systems – are as important as costs caused by the production of those goods and services. Efficient coordination of transactions in markets and companies by institutional design constantly offers new challenges for states as well as for companies within an unwavering, further intensifying, global competition. Digitalization of economic processes does not only change the scale (Big Data) but also the matter of economic transactions. Economic analysis and applications deal with effectiveness of market imperfections and its control by governance structures and contractual incentive systems.

Corporate Strategies and Processes (CSP)

Modern companies put an end to the traditional separation of strategy development by market and environment analysis and organization development regarding the design of internal processes. It is replaced by strategic management that, as a process, coordinates corporate structures and value-adding processes and orientates itself on rapidly changing environmental conditions and internationality. Besides strategic management in particular, this addresses also technology and innovations management, supply chain and operations management as well as – caused by the advancement of digitalization and availability of Big Data – Business Analytics. Evidently all other business disciplines make a contribution as well as some economic disciplines, such as industrial organization, labor economics and interdisciplinary approaches such as cooperative economics and Share Economy.

Data Science and Analytics (DSA)

In times of availability of Big Data of nearly all societal domains and with increasing complexity of this Data (“High Dimensional Data”) the development of suitable statistical methods, algorithms and appropriate optimization methods is more urgent and important than ever. Demand for academically trained specialists in Data Science and Analytics on national and international job markets is high. This results in challenges for the application field as well as for the latest methodological developments in statistics (analysis of high dimensional and heterogenic data, modelling, model selection and inference), Operations Research (optimization and modelling) and quantitative and computer-assisted economics (Business Analytics, Finance and Applied Econometrics). Applications are especially important for analyzing currency, securities and energy markets, banks, insurances and their financial institutions, corporate finance of companies, as well as for logistics and operations management, currently for epidemiology, technical sciences and physics.

Human Behavior and the Economy (HBE)

Human behavior in economic decision-making lies at the core of this research theme. In order to make predictions with business and economic models, it is crucial to make assumptions about human behavior. In experimental economics, on the other hand, these assumptions and models are put to the test. The interplay between theoretical and experimental approaches allows for a more realistic model regarding human decision-making. The results of this research today are the foundation for its application in nearly all disciplines of our faculty, ranging from analysis of economic and regulation policies and behavioral finance to solving business issues f. e. in marketing, strategy, organization, personnel and economic sociology.

Management of Resources (MR)

Resources – natural, human, financial and informational resources – are the basic input of economic activity. Their availability or shortage determine growth and development. Asymmetries in their distribution and privatization caused by economic parties triggers strategic behavior. Management of resources aims at the efficient use of resources in economic systems, on a societal as well as corporate level. Economic analyses and contributions focus on growth and development of regions, sustainable environmental and energy policies and management, production and logistics within value-added-chains, design of educational and training systems as well as efficient information systems and their management.

Publications

This section reports on our research that has been published (in print) in the calendar year 2019. Most of our research is published in learned journals. Journals are divided in three broad categories in which our best publications can be assigned to Category 1 and Category 2 according to our Faculty Journal List. Those publications that cannot be assigned to either one of our categories are summarized as “Other Journal Publications”

Category 1 comprises the very top journals. Members of our Faculty have published a total of 17 articles in such journals and 10 are assigned to the Categories “Online First” and “Forthcoming”.

Category 2 journals are among the top 25% of their fields or are named as very good in selected field-specific complementary lists. We count 32 publications in such journals

and 15 in the Categories “Online First” and “Forthcoming”. Other journal articles and other publications such as monographs and contributions to collected volumes are listed below. We do not list working papers.

The publications are listed alphabetically by author(s). Our **tenured faculty members** are documented in blue, whereas non-tenured faculty members are marked in grey. We report the underlying field(s) of research according to the themes defined on the previous page.

- CMI = Changing Markets and Institutions
- CSP = Corporate Strategies and Processes
- DSA = Data Science and Analytics
- HBE = Human Behaviour and the Economy
- MR = Management of Resources

Theses Completed

Our PhD education offers training and supervision that allows students to acquire knowledge and skills necessary for a research-oriented career in the core fields of our Faculty. The successful completion of the PhD programme marks the entry into the scientific community and it shows the ability to carry out independent research. We congratulate the 19 PhD students who completed their thesis in 2019.

Moreover, we proudly announce that one scholar has received the Venia Docendi: Georgios Halkias in Business Administration. The Venia is awarded for outstanding scientific qualifications and testifies to the scholars' ability to hold lectures, teach and supervise students at all levels. The successful candidate has submitted a thesis that has been deemed methodologically sound, provides new scientific insights and demonstrates excellence in mastering the subject.

Editorial Work

Numerous members of our Faculty are engaged in editorial and publishing activities. In particular, many of our Faculty members serve as editors, associate editors, or members of editorial boards of established journals.

The list below shows who serves in which role for which journal. We do not list refereeing activities, as members of our Faculty have, in total, most likely written several hundreds of these, and many of us serve as referees for prestigious journals.

Category 1 Journals

Editor-in Chief, Co-Editor

Econometric Theory:
Pötscher, Benedikt (since 1995)

Associate Editor

Journal of Business and Economic Statistics:
Hautsch, Nikolaus (since 2015)

Operations Research:
Pflug, Georg (since 2012)

Transportation Science:
Hartl, Richard (since 2012)

Editorial Board

Experimental Economics:
Müller, Wieland (since 2014); Tyran, Jean-Robert (since 2009)

Journal of International Business Studies:
Diamantopoulos, Adamantios (since 2007)

Organization Science:
Reitzig, Markus (since 2014)

Production and Operations Management:
Gutjahr, Walter (since 2015)

Review of Economic Studies:
Schmidt-Dengler, Philipp (2012-2019)

Strategic Management Journal:
Reitzig, Markus (since 2013)

Category 2 Journals

Editor-in Chief, Co-Editor

European Journal of Operational Research:
Bomze, Immanuel (since 2016)

International Journal of Industrial Organization:
Schmidt-Dengler, Philipp (since 2014)

OR Spectrum: Quantitative Approaches in Management:
Gutjahr, Walter (since 2014)

Associate Editor

International Journal of Forecasting:
Hautsch, Nikolaus (since 2015)

Journal of Applied Econometrics: Schmidt-Dengler,
Philipp (since 2014); Hautsch, Nikolaus (since 2015)

Journal of Economic Dynamics and Control:
Sorger, Gerhard (since 2001)

Journal of Financial Econometrics:

Externally Funded Research Projects

In this chapter we present our extensive research projects. The Faculty of Business, Economics and Statistics and its members engage in various research fields with multiple funding sources. Our biggest sponsors worth mentioning are the Austrian Science Foundation (FWF), the Austrian National Bank (OeNB) and the Christian Doppler Research Association (CDG). Funding as well as cooperation with other institutions and partners plays an essential part in our Faculty's aim to research a broad range of scientific issues.

Sources of External Funding (in thousand €)

	2015	2016	2017	2018	2019

Externally Funded Individual Projects

Network Optimization & Analysis

Contact Person: Leitner, Markus
Research Themes: Corporate Strategies and Processes (CSP),
Management of Resources (MR)
Funding Source: WWTF (Vienna Science and Technology Fund)
Funding: 450,000.00 €
2015 - 2019

Networks are a ubiquitous tool to model the growing amount of data collected in science and business. In areas such as telecommunications, location theory, or social networks analysis (SNA), the size of the resulting networks and application data is ever increasing and analysis methods for large-scale data are crucial to deal with them in a meaningful way. Typically, there are also inherent uncertainties associated with the input data and the implied optimisation problems often face multiple objectives. These three aspects (large-scale data, uncertainty and multiple objectives) limit the applicability of available optimisation algorithms that are capable to deal with at most one (if any) of these aspects. Following our recent "thinning out" modelling approach, we aim to develop novel mathematical models and algorithmic solutions for solving highly relevant problems from operations management, telecommunications, and SNA at the large scale. We plan to exploit parallelization techniques, sparse mathematical models and general-purpose heuristics, to reconsider decomposition approaches, and apply them in the context of high-performance computing. The obtained results will enable the consideration of uncertain input data and / or multiple objectives at the large scale. To this end, various robust optimisation concepts and their applicability in multi-objective settings will be analysed. Results will be used to derive high-performance solution methods aiming to solve realistic, large-scale problem instances. These approaches will be based on mixed-integer (non-linear) optimisation, heuristics and parallelisation methods.

Distributive Preferences and Need-based Justice in Networks

Contact Person: Kittel, Bernhard
Research Themes: Changing Market and Institutions (CMI),
Human Behavior and the Economy (HBE)
Funding Source: FWF (Austrian Science Fund)
Funding: 392,227.00 €
2018 - 2021

The research group "Needs-based Justice and Distributive Procedures" intends to contribute to a positive and informed normative theory of needs-based justice supported by experimental evidence. This theory aims at providing answers to four questions: (i) How do individual identify needs and which distributions are considered sufficient for identified needs? (ii) Which distributions are collectively recognized and how is the process of recognition organized? (iii) Which dynamics does the process of collective recognition effectuate with regard to the stability of a political agreement? And (iv) What are the consequences of the incentives at the collective

and individual level and how sustainable are redistributive agreements? We expect the principle of needs-based justice to minimize the tension between self-interested and strategically induced distributive preferences (social preferences) and ethically reflected principles of justice under two conditions: The recognition of needs takes place in a transparent way (social objectification) and available expert information is optimally used (factual objectification). Answers to the four questions are sought by referring to two core hypotheses: The transparency hypothesis states that the individual and collective recognition of a distributive solution increases with the level of transparency of decision processes. In analogy, the expertise hypothesis states that the objectification of decisions to recognize needs by reference to expertise increases the acceptance of a distributive solution. Each of eight interdisciplinary projects focuses on one of the four research questions from the perspective of one of the two hypotheses. Project B1 "Distributive Preferences and Needs-based Justice in Networks" uses a theory-driven experimental approach to study the recognition of needs as legitimate claims in the context of network structures and the consequences thereof on the outcome of bilateral distributional negotiations. Building on sociological network exchange theory, we analyse the effect of network structures, the transparency of structures for the actors involved, the number of possible bilateral agreements, and social preferences of position holders on the observance of needs in distributional agreements. Assuming self-interested, utility-maximizing behaviour, equality in distributional outcomes tends to be generated by balanced power relations and information on the network structure. Unbalanced power networks, however, promote highly skewed distributions in favour of high-power positions. While this general pattern has been supported by repeated experiments, other network experiments, however, reveal systematic deviations from these expectations. In particular, holders of structural power positions tend to act more pro-socially under certain context conditions. The main research question is whether, in contrast to other justice principles, needs-based justice is recognized as a distributive principle in network structures otherwise hostile to redistribution. This result would suggest that needs-based justice principles have a higher potential to legitimize distributions than other principles.

Network Optimization in Bioinformatics and System Biology

Contact Person: Bomze, Immanuel; Ljubic, Ivana
Research Themes: Corporate Strategies and Processes (CSP),
Data Science and Analytics (DSA), Management of Resources (MR)
Funding Source: FWF (Austrian Science Fund)
Funding: 347,760.00 €
2014 - 2019

Mathematical models and algorithmic approaches for solving combinatorial optimisation problems from the field of network optimisation are known to be essential in telecommunications and the design of transportation and supply chain networks. More recently, it has been

discovered that network optimisation algorithms are also crucial in the context of bio-informatics and system biology. Numerous publications in system biology point out that studying functions, structures and interactions of proteins in combination with networks can provide new insights regarding robust biomarkers and can allow new discoveries regarding protein functions, or testing of new hypothesis regarding their interactions. Network optimisations algorithms have also been applied in the analysis of functional modules in protein-protein interaction networks, the discovery of regulatory subnetworks, in revealing hidden components in biological processes, or in detecting transcription factor modules. Motivated by these recent developments, we aim to study several network optimisation problems that are among the most challenging ones in the fields and that were not sufficiently studied or understood so far. In this project we also aim at developing the first supernetwork-driven approach in combinatorial optimisation that will seamlessly integrate various methodologies from operations research (exact and metaheuristic approaches for network optimisation) and computer science (machine learning) into a single mathematical framework.

Information Acquisition, Diffusion and Disclosure in Markets

Contact Person: Janssen, Maarten; Mauring, Eeva; Garcia, Daniel
Research Themes: Changing Market and Institutions (CMI),
Corporate Strategies and Processes (CSP)
Funding Source: FWF (Austrian Science Fund)
Funding: 342,349.00 €
2018 - 2021

Whether or not markets perform well in coordinating demand and supply depends to a large extent on the information agents possess. Often consumers need to acquire information about product characteristics and prices to be able to carefully compare the product offerings of different firms. Market power of firms depends on the information consumers have. If consumers are not informed about alternative prices, market power arises naturally as a consequence of the lack of information. On the other hand, firms may have incentives to reveal some of their private information. Information disclosure by firms may take the form of self-advertising, information provided by third party intermediaries or rating agencies. An important question in this regard is whether the information that firms directly or indirectly provide is verifiable or not. In the latter case, firms may lie about the information they provide and consumers must decide whether to trust the information or not. If information is non-verifiable, firms may not have an incentive to disclose information in the first place as the content may not be trusted by consumers.

Acquisition, disclosure and diffusion of information are clearly related. When few people acquire information, little information can be diffused, while if information is disclosed and disseminated efficiently, people may not have the incentive to incur a cost to acquire more information themselves.

This project brings together researchers at the economics department at the University of Vienna and researchers at the National Research University Higher School of Economics (Moscow). They will work on different subprojects where the relationship between information acquisition, disclosure and diffusion is explored. The project envisages to organize one workshop in Moscow and an international conference in Vienna.

Navigating Brand Preference through Consumers' Stereotypes

Contact Person: Diamantopoulos, Adamantios; Florack, Arnd
Research Theme: Human Behaviour and the Economy (HBE)
Funding Source: FWF (Austrian Science Fund)
Funding: 342,349.00 €
2018 - 2021

This project focuses on three distinct kinds of stereotypes that are expected to influence consumer behavior, involving beliefs about the characteristics of (a) typical users of a certain brand (brand user stereotype), (b) different countries and their people (country-of-origin stereotype), and (c) different brands (brand stereotype). As the usefulness of stereotypes as explanatory constructs in consumer behavior is clearly dependent on their ability to boost perceptions of consumer value and/or mitigate perceived risk, this is one important issue examined in the project. Moreover, the extent to which the interplay between multiple consumer stereotypes is characterized by cross-national stability (or otherwise) will also be assessed.

Organizational Design for New Organizational Forms

Contact Person: Reitzig, Markus
Research Theme: Corporate Strategies and Processes (CSP)
Funding Source: FWF (Austrian Science Fund)
Funding: 333,291.00 €
2014 - 2020

We propose to study if – and where – extant theories of organizational design require elaborations in order to explain the emergence and effectiveness of so-called new organizational forms such as open source software or new business models. We suggest that classic theories of organizational design – among them Carnegie school and its derivatives (e.g. contingency theory), while capturing important features of even novel forms of organizing, may benefit from elaborations regarding three distinct sub-questions, namely: how relevant are authority and hierarchy, traditional solutions to the design challenge of dividing labor and integrating effort, to new organizations? Second, under which conditions is self-selection considered to be an important solution to the organizational design challenge in new forms of organizing, truly effective? Third, how do different solutions to the design challenges of task division, task allocation, rewards distribution, and information provision complement one another?

Josef Ressel Centre for Adaptive Optimisation in Dynamic Environments (JRC AdaptOp)

Contact Person: Dörner, Karl Franz
Research Theme: Data Science and Analytics (DSA),
Management of Resources (MR),
Funding Source: CDG (Christian Doppler Forschungsgesellschaft)
Funding: 331,904.00 €
Duration: 2019 - 2024

Abstract JRC:

The Josef Ressel Centre for Adaptive Optimisation in Dynamic Environments (JRC AdaptOp) identifies new applications in dynamic real-world environments and aims at the development of planning approaches that can cope with continuously changing conditions. Dynamic optimisation problems (DOPs) in domains such as warehousing, production, and transportation are primarily addressed in this context. The workloads of gantry cranes, heavy-duty vehicles, and glass production lines are subject to optimisation. New DOPs within these domains will be formulated and new benchmarks will be created. The goal is to build a framework for open-ended adaptive methods, facilitating the detection of changes in the environment and the reaction to them. The integration of machine learning techniques to predict the occurrence of future events, devise potential future scenarios, and select and configure promising algorithms is also a major research focus. Finally, the methods' performances will be studied and compared within controlled simulation experiments and evaluated within real-world test environments at the JRC's industrial partners Industrie-Logistik-Linz GmbH (ILL), LiSEC Austria GmbH (LiSEC), Logistik Service GmbH (LogServ), and voestalpine Stahl GmbH (voestalpine).

Abstract external module of the University of Vienna:

The University of Vienna, as an external module of the JRC, studies the transportation and intermediate storage of semi-finished casting products, so-called steel slabs, inside a steel-producing plant. Within the scope of intra logistical optimisation efforts, the research emphasis is threefold. First, solve a pickup and delivery problem that addresses the transportation of steel slabs as they pass multiple production stages, all of which are carried out at different locations inside the plant. Second, address the storage of work-in-process materials during the time they are buffered in large (outdoor) storage yards, waiting to be fed into the next stage of the production process. As the storage yards are organised in rows and function as two-dimensional stacking areas, consisting of stacks built up by steel slabs being located on top of each other, it is of utmost importance to ensure that the stacks remain organised while being manipulated during steel slab pickups or deliveries. Third, increase productivity by pre-marshalling slab yard stacks. This refers to the re-organisation of stacks such that varietal purity of stacks is maintained by making sure that slabs of a certain order or type are stored closely together in a desired sequence.

Evaluation of Soft Measures to Promote Student Success

Contact Person: Tyran, Jean-Robert; Sonntag, Axel
Research Theme: Human Behaviour and the Economy (HBE)
Funding Source: Austrian Federal Ministry of Education,
Science and Research (BMBWF)
Funding: 300,000.00 €
2016 - 2019

The aim of this research project is to systematically evaluate various "soft" measures implemented by the University of Vienna to promote student success. Measures are called "soft" if they do not entail regulations for students or are based on economic incentives like sanctions or rewards. Therefore, students are not coerced or constrained by soft measures and remain entirely free to choose the pace and sequence of their studies as if the measures were not present. Soft measures are also cheap to implement. Typical examples of such measures are reminders of important deadlines or providing online tools for planning coursework. To evaluate the effectiveness of such measures, the University plans to implement a series of soft measures at different times in different faculties. Not all students will therefore experience the same measures at the same time. The purpose of the evaluation is to determine which measures are particularly effective such that they can be used to the benefit of all students.

Understanding Consumer Search

Contact Person: Schmidt-Dengler, Philipp; Garcia, Daniel
Research Themes: Changing Markets and Institutions (CMI),
Corporate Strategies and Processes (CSP), Data Science and
Analytics (DSA), Human Behaviour and the Economy (HBE)
Funding Source: FWF (Austrian Science Fund)
Funding: 271,650.00 €
2018 - 2021

In most retail markets, consumers have to spend time and other resources in order to gather information about prices and other product characteristics. The process through which this information is gathered, referred to as the search protocol, has important implications for demand estimation and market structure. In this project we aim to introduce a new test that allows us to identify the protocol consumers use in the presence of learning and implement it using real-world web browsing data and online field experiment specifically designed for this question.

Order Book Foundations of Price Risks and Liquidity: An Integrated Equity and Derivatives Markets Perspective

Contact Person: Hautsch, Nikolaus
Research Themes: Changing Markets and Institutions (CMI),
Data Science and Analytics (DSA)
Funding Source: FWF (Austrian Science Fund)
Funding: 243,000.00 €
2017 - 2020

Most financial markets are nowadays organized in the form of electronic limit order book markets. The introduction of electronic trading has substantially changed the trading landscape over the last decade. Many high-speed activities on financial markets are not well understood and are subject of concerns to market operators and regulators. This research will be the first project bringing together the limit order books (LOBs) of a stock market with those of derivatives written on this asset. Using empirical and statistical models the project will investigate the vast amount of information provided by integrated stock and derivative LOBs. This information will be processed to measure and predict risks associated with volatility, liquidity and price jumps. The project addresses two major research questions: First, can we exploit detailed LOB data of stocks and corresponding options to improve the measurement and prediction of volatility? Second, how does LOB information spill over from equity and derivative markets and how can this information be used to better understand the determinants of volatility, liquidity and jump risks on the micro level?

Self-serving views on redistributive fairness

Contact Person: Dezsö, Linda; Tyran, Jean-Robert
Research Theme: Human Behaviour and the Economy (HBE)
Funding Source: FWF (Austrian Science Fund)
Funding: 234,000.00 €
2018 - 2022

Experimental research on distributive preferences reports that people prefer compensating low income through redistribution when it is due to factors one cannot control. However, there are situations where partners' incomes were previously unequal, while in a new, present income allocation they receive equal outcomes. Only one paper examines a similar situation, finding that the person with the unfortunate history self-servingly believes that he is entitled to compensation for his past, while the person with the fortunate history believes that the past is irrelevant to the present. We propose an agenda investigating how history shapes distributive preferences, and the association between distributive fairness violations and unethical behavior. We argue that examining the relationship between history and distributive preferences sheds light, for example, on whether a fair welfare system should consider individual contribution history.

First, we ask if asymmetric contribution history to joint earnings leads to self-serving invocations of history between partners when proposing divisions. Second, we address whether partners sharing asymmetric initial income levels due to a previous allocation hold divergent views about the fair distribution of new, jointly created proceeds to which they contributed equally. We study the extent to which preferences for maintaining income hierarchy and inequality aversion (beyond greed) drive distributive preferences. Relatedly, we examine the association between imposing a distributive

scheme on the rich and poor and subsequent unethical behavior. Imposed distributive schemes would systematically vary how much post-distribution rank is maintained/reversed and how income inequality is decreased/increased between them.

Supranational climate-policy delegation

Contact Person: Pichler, Paul
Research Themes: Changing Market and Institutions (CMI), Human Behaviour and the Economy (HBE), Management of Resources (MR)
Funding Source: FWF (Austrian Science Fund)
Funding: 210,010.00 €
2018 - 2021

International agreements to fight global warming in the past often had limited success or failed altogether, such as the Copenhagen Summit in 2009. Against this background, there have been recurrent proposals by academic researchers, policy advisors, and political commentators to create a supranational climate protection authority with the explicit mandate to fight global warming, and to delegate decision power over certain climate-relevant policies once and for all to this authority. Their argument is that an independent authority can implement necessary but painful climate-policy reforms much better than elected politicians, who are often driven by myopic re-election concerns. The aim of the proposed project is to better understand whether this argument in favor of a supranational environmental authority is indeed valid. We plan to carefully study if and when it may be economically beneficial for countries to delegate climate-relevant policies, and how such delegation would affect international climate policies. We plan to address these and other related questions within a theoretical economic model of climate policy, designed to capture the key trade-off between the economic benefits of energy consumption, investment into clean technologies for energy production, and environmental pollution costs. The proposed project is the first to develop a theoretical model of supranational climate-policy delegation and ask whether an independent supranational environmental authority could alleviate the pressing problem of global warming. It thereby contributes to an important discussion on the design of socio-economic institutions to guarantee sustainability of economic policies for the years to come.

Sansero Safe and Secure Routing

Contact Person: Dörner, Karl Franz
Research Theme: Management of Resources (MR)
Funding Source: FWF (Austrian Science Fund)
Funding: 180,548.00 €
2015 - 2019

In this project, a new multi-criterial vehicle routing problem is studied in which different locations demand for periodic

service. The objective is to determine cost efficient yet heterogeneous tours. The latter is defined such that repeating particular sequences of nodes or edges has to be avoided and that service at specific nodes or edges are serviced at the same time of day they have already been serviced before.

Dynamic Uncertainty Modeling in Finance

Contact Person: Klein, Irene; Cuchiero, Christa
Research Theme: Changing Markets and Institutions (CMI),
Data Science and Analytics (DSA)
Funding Source: FWF (Austrian Science Fund)
Funding: 128,142.00 €
2018 - 2021

Since the beginning of the financial crisis in 2007, stability of financial markets has become a major topic attracting a lot of attention from experts in finance, economy and politics. In the field of mathematical finance, this led for instance to the emergence of a branch called “robust finance”, which aims at making financial modeling more solid in times of crises. The goal of this project is to establish two important aspects in this area: introducing dynamic modeling ideas and jointly capturing model risk and information risk.

Mathematically, we incorporate model risk via so-called mixture-models and non-linear Markov processes. In both approaches parameter uncertainty and its dynamic nature due to incoming information is explicitly taken into account. In other words we accommodate the view that model risk is among other things a consequence of insufficient or even wrong information. This information risk is modeled via two filtrations. The smaller filtration contains the information actually available to market participants, while the larger filtration also includes (idealized) information on unobservable quantities. Prices are supposed to be adapted to the larger filtration, whereas actual observations can only be done in the smaller filtration, because of unreliable data sources and discrete and noisy signals. This allows us to go beyond the usual assumptions taken in mathematical finance – for example, price processes do not need to be semimartingales any longer. In this general two-filtration setup in continuous time we analyze all foundational questions, like fundamental theorems, superhedging, stochastic integration and model calibration.

Our main field of application are fixed income markets with multiple yield curves, which became due to the financial crisis highly important. These markets are a prototypical example for model uncertainty being caused by unobservable but important factors, namely liquidity and credit risk in this case. Beyond that they show the necessity of a new formulation of the mathematical modeling setup within which we aim to lay the theoretical foundations to answer questions of model calibration, pricing and hedging.

A Stakeholder Theory Perspective on Franchise Relationships

Contact Person: Windsperger, Josef
Research Theme: Corporate Strategies and Processes (CSP)
Funding Source: OeNB Anniversary Fund
Funding: 124,000.00 €
2019 - 2020

The aim of this study is to investigate franchise relationships through the lens of stakeholder theory. We contribute to stakeholder and franchising literature by showing that franchisees play multiple stakeholder roles (i.e. of customers, employees, investors, or business partners), and as such, warrant higher priority and managerial attention from their franchisors. We demonstrate that stakeholder theory can alternatively provide the basis for exploring the multilateral nature of franchisor-stakeholder relationships as a way of managing various stakeholders’ interests for joint value creation. We apply a three stage least squares estimation (3SLS) approach to reveal that franchisors’ stakeholder salience is not only influenced by individual stakeholder attributes (such as power, legitimacy, and urgency), but also by the perceived salience of the other stakeholders.

Low Emission Electric Freight Fleets (LEEFF)

Contact Person: Dörner, Karl Franz (project collaboration with external partners)
Research Theme: Management of Resources (MR)
Funding Source: FFG (Austria Research Promotion Agency)
Funding: 122,500.00 € (attributed to our Faculty; total funding of project 2,679,000.00 €)
2016 - 2019

As the LEEFF (Low Emissions Electric Freight Fleets) project follows an integrative multiperspective approach to the Call objectives, the key elements of the examined system have to be identified. These key elements contribute to reach the target of a commercially viable overall solution for an electric fleet operation addressed by the Call. To reach the set targets, an advanced eVan together with an adapted battery and a smart charging station for commercial use at logistical hubs will be developed and an innovative business model for fleet operators together with adapted planning and communication tools realised as a prototype. The target users will be provided practical guidelines, a show case presentation based on a comprehensive demonstration mode and a strategic implementation.

When do culturally diverse groups create value?

Contact Person: Keck, Steffen
Research Theme: Human Behavior and the Economy (HBE),
Management of Resources (MR)
Funding Source: OeNB Anniversary Fund
Funding: 120,000.00 €
2018 - 2019

The question whether groups actually benefit or are being harmed from cultural diversity has not been answered conclusively as of today. In this project we will contribute to closing this gap in our current knowledge by addressing two important limitations of prior work in this area which has typically treated cultural diversity as a one-dimensional construct and furthermore assumed that cultural diversity has a fixed static effect on group outcomes. In contrast, in this project we will explicitly focus on a) the role of multi-cultural group members and b) explore the dynamic effects of group diversity over time.

Consistent Stochastic Inventory Routing Management (COSIMA)

Contact Person: Dörner, Karl Franz
Research Theme: Management of Resources (MR)
Funding Source: FWF (Austrian Science Fund)
Funding: 118,104.00 €
2016 - 2019

This project integrates two fundamental logistical aspects that are typically investigated independently or sequentially: inventory management and transportation routing optimization. We extend the existing knowledge with regard to essential real-world characteristics of such problems and develop new approaches for the integration of these two aspects. Stochastic demands at the retailers are typically non-stationary and correlated, emergency shipments are allowed and service level requirements have to be met. Moreover, we incorporate consistency, i.e. delivery at a certain retailer should always take place within the same time interval. This leads to a two-stage multi-echelon inventory problem with routing, stochastic lead times and non-equidistant review periods.

Heuristic Optimization in Production and Logistics (HOPL)

Contact Person: Dörner, Karl Franz
Research Theme: Management of Resources (MR)
Funding Source: University of Applied Sciences Upper Austria Wels Campus
Funding: 35,254.00 €
2018 - 2019

Increasing quality expectations, complex handling processes, and high throughput volumes lay particular stress on the steel industry. Crucial tasks of steel producing plants are the transportation and intermediate storage of steel slabs over time. Steel slabs are heterogeneous semi-finished products that are produced at continuous casters and further processed inside the plant. According to specific handling instructions, the cast steel must pass additional treatment stages, involving scarfing, resting and temperature-regulating handling processes. All of these treatment stages generate transportation requirements, which in turn trigger stacking and sorting processes. Within the scope of intra logistical

optimization efforts, the emphasis of our study is twofold. First, we develop a transportation model that addresses the routing of steel slabs as they pass multiple production stages, all of which are carried out at different locations inside the plant. Second, we address the stacking and sorting of work-in-process steel slabs during the time they are buffered in large storage yards, waiting to be fed into the next stage of the production process. By developing a combined approach that optimizes the transportation and stacking of steel slabs, cost-cutting potentials and efficiency improvements can be revealed.

Out-of-sample Prediction Using Shrinkage Estimators

Contact Person: Leeb, Hannes
Research Theme: Data Science and Analytics (DSA)
Funding Source: FWF (Austrian Science Fund)
Funding: 192,181.00 €
2013 - 2019

In regression, performance analyses of shrinkage estimators are mainly focused on parameter estimation and on in-sample prediction. Little is known about the performance of shrinkage estimators for out-of-sample prediction, where the goal consists of estimating the regression function at new and un-observed points. Recently, Huber and Leeb (2013) showed that the James-Stein estimator can fail to dominate the maximum-likelihood estimator for out-of-sample prediction. The goal of the proposed research project is to analyse this and related phenomena, to design new shrinkage estimators with good predictive performance out-of-sample, and to develop inference methods like prediction intervals based on these new estimators.

Externally Funded Graduate Schools

Vienna Graduate School of Economics

Contact Persons: Cunat, Alejandro; Janssen, Maarten; Schmidt-Dengler, Philipp; Müller, Wieland; Schlag, Karl; Merz, Monika; Pichler, Paul; Garcia, Daniel; Sorger, Gerhard
Partner Institutions: Institute for Advanced Studies (IHS)
Research Themes: Changing Market and Institutions (CMI), Human Behavior and the Economy (HBE)
Funding Source: FWF (Austrian Science Fund)
Funding: 1,669,531.00 €
2017 - 2021

VGSE offers a broad three-year PhD program in economics with a world-class faculty located in the center of Vienna. VGSE specializes in offering field courses and research seminars where students and professors present ongoing research, and intensively supervised research time. The faculty members are recognized by the international research community as experts in microeconomics, macroeconomics, or econometrics and are well connected to the international research community. The program aims at attracting the best students from a master's program with advanced courses in microeconomics, macroeconomics, and econometrics. Students graduating from VGSE develop into independent researchers of the highest academic standards.

Vienna Graduate School on Computational Optimization

Contact Person: Bomze, Immanuel; Pflug, Georg
Partner Institutions: Faculty of Mathematics, Faculty of Computer Science, Vienna University of Technology (TU), Institute of Science and Technology Austria (IST)
Research Theme: Data Science and Analytics (DSA)
Funding Source: FWF (Austrian Science Fund)
Funding: 398,949.00 € (attributed to our Faculty; total funding of project 1,595,795.00 €)
2016 - 2019

The Vienna Graduate School on Computational Optimization (VGSCO), financed by the Austrian Science Fund (FWF), is a collaboration between the Faculty of Business, Economics and Statistics, the Faculty of Mathematics and the Faculty of Computer Science (all 3 of University of Vienna), the University of Technology (TU) Vienna and the Institute of Science and Technology (IST) Austria. It was started in fall 2016 with 8 fully and 10 partially funded students who were carefully selected in a competitive manner. The goal of the research and training programme of this Graduate School is to give the PhD candidates a comprehensive training in optimization with special emphasis on algorithmic and computational aspects as well as to prepare them for a scientific career by introducing them into the scientific networks of the participating scientists. The structure of the programme also allows to study the relations between different areas of optimization. In the long term, the collaboration between the members and their institutions will be fostered in order to make Vienna a place of excellence in Computational Optimization.

Vienna Graduate School of Finance (5th Funding Period)

Contact Persons: Gehrig, Thomas; Hautsch, Nikolaus; Loranth, Gyöngyi
Partner Institutions: Vienna University of Economics and Business (WU) & Institute for Advanced Studies (IHS)
Research Themes: Changing Market and Institutions (CMI)
Funding Source: FWF (Austrian Science Fund)
Funding: 350,000.00 € (attributed to our Faculty; total funding of project 1,350,000.00 €)
2018 - 2022

The VGSF is a joint graduate school of the University of Vienna, WU, and the Institute for Advanced Studies. The VGSF offers a well-structured, top-notch PhD program in Vienna. The Faculty members are part of an international network and leading scholars are invited to teach courses or present in seminars. The program is entirely run in English. VGSF has an excellent track record with placements at MIT, Georgia Tech, University of Wisconsin, University of Amsterdam, Aarhus University, BI Norwegian Business School, University of Oslo, University of Copenhagen, Humboldt University, University of Odense, Hong Kong University, University of Calgary, Swiss Finance Institute and many more.

Other Fundings

Vaccine Mapping in Vienna Primary Schools

Contact Person: Rauner, Marion; Blaschke, Sabine
Research Theme: Corporate Strategies and Processes (CSP),
Management of Resources (MR), Human Behavior and the
Economy (HBE)
Funding Source: Merck Sharp & Dohme GesmbH
Funding: 35,000.00 €
2018 - 2019

This industrial collaboration focuses on the execution of vaccine mapping for Vienna primary schools. With interview-based research (qualitative and quantitative) a questionnaire is developed based on international literature to investigate the current stage of the vaccination situation regarding children in 4th grade based on statistical methods. The size of the target sample is about 40 schools and about 1,600 pupils with at least one school in each of the Viennese districts. The main aim is to identify reasons for vaccination gaps (since the child vaccination program is fully reimbursed in Austria) and to create solutions to close vaccination gaps.

Working Group „Financial Crises“

Contact Person: Gehrig, Thomas
Research Theme: Changing Markets and Institutions (CMI)
Funding Source: ÖFG (Österr. Forschungsgemeinschaft)
Funding: max. 15,000.00 € per year
2013 - 2019

The working group “Financial Crises“ is a forum for scientific analysis of the European economic crises of the new millennium. It focusses on creating public information as a basis for public discussion to cope with those crises and prevent future even more challenging ones. Therefore, the working group contributes to providing facts and raising awareness for public debates on financial crises and crises in general. It addresses the fundamental question whether, and, if yes, how, liberal social systems can be organised in a resilient manner.

Dissemination of Research

This section lists our activities in disseminating, discussing and debating research, starting with a list of talks given by our Faculty from the University of Vienna by speaker in chronological order. Subsequently, we mention research visits and collaborations realised by our Faculty. We then state workshops that have been (co-)organised by members of our Faculty, as well as presentations in one of our many seminar series. We close this section by indicating awards and fellowships our Faculty members received in 2019.

Talks

Zur Lage der österreichischen Wirtschaft und den notwendigen Strukturreformen

Thomas Gehrig (Contributor)
Universität Zürich (UZH), Switzerland
9 May 2019

A Pragmatist Response to Crisis—Survey evidence of Attitudes toward the EU from Poland, Hungary, and Slovakia

Monika Mühlböck (Speaker)
EUSA International Biennial Conference, Denver/United States
9 May 2019

Lacking a national position? Abstentions in the Council of the European Union

Monika Mühlböck (Speaker)
2019 EUSA International Biennial Conference,
Denver/United States
11 May 2019

A Tale of Two Cities – Inter-Market Latency, Market Integration, and Market Quality

Satchit Sagade (Contributor), Stefan Scharnowski (Contributor), Erik Theissen (Contributor), Christian Westheide (Speaker)
The Future of Financial Information, Stockholm/Sweden
13 May 2019 - 14 May 2019

Hochfrequenztechnologie und Blockchain: Finanzmärkte im Umbruch

Nikolaus Hautsch (Keynote speaker)
Wirtschaftsforum der Führungskräfte, Austria
14 May 2019

Hier reden alle mit! Flache Hierarchien im Reality-Check

Markus Reitzig (Invited Speaker)
uniport JobTalk, Vienna/Austria
14 May 2019

Was beeinflusst (un-)moralisches Verhalten in der Wirtschaft?

Martin Kocher (Speaker)
Wirtschaftsuniversität Wien (WU), Vienna/Austria
15 May 2019

Wie bringt man die Bevölkerung dazu, Prävention zu machen

Martin Kocher (Speaker)
Praevenire, Seitenstetten/Austria
16 May 2019

On Autocorrelation Robust Tests and Testing for Trends

Benedikt Pötscher (Invited speaker)
4th Vienna Workshop on High-Dimensional Time Series in Macroeconomics and Finance, Vienna/Austria
16 May 2019 - 17 May 2019

Ambiguity and distributionally robustness in stochastic optimization

Georg Pflug (Invited speaker)
Technische Universität München, Germany
17 May 2019

Utility maximization in a two filtration setting

Irene Klein (Invited speaker)
Freiburg-Wien-Padova-Zürich Seminar, Padova/Italy
17 May 2019

Local Mispricing and Microstructural Noise: A Parametric Perspective

Nikolaus Hautsch (Invited speaker)
Justus-Liebig-Universität Gießen (JLU), Germany
21 May 2019

Schumpeter Seminar: Pecuniary Externalities in Economies with Downward Wage Rigidity

Martin Wolf (Speaker)
Technische Universität Berlin, Germany
21 May 2019

Perceived Tax Burdens and Preferences for Redistribution – Evidence from a Survey Experiment

Fabian Kalleitner (Speaker)
Varieties of Welfare Capitalism in Times of Socio-Economic Insecurity: International PhD Workshop, Berlin/Germany
21 May 2019

Clean your 'sheet: The Interfirm Late Payment Clearinghouse

Jurica Zrnc (Speaker)
13th International Conference “Challenges of Europe”: “Growth, Competitiveness, Innovation and Well-being”, Split/Croatia
23 May 2019

Raschere Arbeitsmarktintegration durch Information und Reflexion? Ein Feldexperiment auf Basis des "Nudge"-Ansatzes

Bernhard Kittel (Speaker)
Jahrestagung des DVPW Arbeitskreises Handlungs- und Entscheidungstheorie, Bremen/Germany
23 May 2019

Contracting Probability Distortions

Victor González-Jimenez (Speaker)
Workshop on Behavioral Economic Decision Sciences, Leicester/United Kingdom
24 May 2019

THE LOGIC OF FEAR – Populism and Media Coverage of Immigrant Crimes

Stephanos Vlachos (Speaker)
Wiener Institut für Internationale Wirtschaftsvergleiche, Vienna/Austria
27 May 2019

Enhancing Persuasive Potential of Narrative Advertisements by Reducing Reactance

Matthias Glaser (Speaker)
EMAC Doctoral Colloquium 2019, Hamburg/Germany
27 May 2019 - 28 May 2019

Narrative Advertising and Implicit Persuasion: The Loss of Persuasive Potential

Matthias Glaser (Speaker)
48th EMAC Annual Conference, Hamburg/Germany
28 May 2019 - 31 May 2019

Metaheuristics for the multi-objective and period node, edge, arc routing problem considering costs and route inconsistency

Georg Erwin Adrian Fröhlich (Speaker)
3rd International Workshop on Arc Routing Problem, Pizzo/Italy
29 May 2019

The Role of Pharmaceutical Promotion to Physicians in the Opioid Epidemic

Dijana Zejcirovic (Speaker)
Research Seminar Department of Economics, University of Linz, Austria
29 May 2019

Migrant Customers' Acculturation and Participation in Host Country Services

Christina Sichtmann (Speaker)
48th EMAC Annual Conference, Hamburg/Germany
30 May 2019

Solution Approaches for the Consistent Stochastic Inventory Routing Problem

Emilio Jose Alarcon Ortega (Speaker), Karl Franz Dörner (Contributor)
Workshop of the EURO Working Group on Vehicle Routing and Logistics optimization (VeRoLog), Seville/Spain
2 Jun 2019 - 5 Jun 2019

The PDP with alternative locations and overlapping time windows

Alina-Gabriela Dragomir (Speaker), Tom Van Woensel (Contributor), Karl Franz Dörner (Contributor)
Workshop of the EURO Working Group on Vehicle Routing and Logistics optimization (VeRoLog), Seville/Spain
2 Jun 2019 - 5 Jun 2019

A hybrid solution method for the vehicle routing problem with locker boxes

Jasmin Grabenschweiger (Speaker), Karl Franz Dörner (Contributor), Richard Hartl (Contributor), Martin W P Savelsbergh (Contributor)
Workshop of the EURO Working Group on Vehicle Routing and Logistics optimization (VeRoLog), Seville/Spain
2 Jun 2019 - 5 Jun 2019

On the Predictive Power of Theories of One-Shot Play

Philipp Külpmann (Speaker)
12th Maastricht Behavioral Experimental Economics Symposium, Maastricht/Netherlands
3 Jun 2019

Was will ich und wofür stehe ich? Die klare Positionierung als Schlüssel für den Bewerbungsprozess

Christina Sichtmann (Speaker)
House of Jobs, Vienna/Austria
3 Jun 2019

Electric Arc Routing

Mario Ruthmair (Speaker)
Workshop of the EURO Working Group on Vehicle Routing and Logistics optimization (VeRoLog), Seville/Spain
4 Jun 2019

Primal-dual splitting methods for control of PDEs.

Teresa Scarinci (Speaker)
INDAM intensive trimester Shape optimization, control and inverse problems for PDEs, Naples/Italy
4 Jun 2019

THE LOGIC OF FEAR – Populism and Media Coverage of Immigrant Crimes

Stephanos Vlachos (Speaker)
National Research University, Moscow/Russian Federation
4 Jun 2019

50'th Konstanz seminar for monetary theory and policy

Martin Wolf (Contributor)
Konstanz seminar for monetary theory and policy, Konstanz/Germany
5 Jun 2019

A Large Neighborhood Search for the Active-Passive Vehicle Routing Problem

Biljana Roljic (Speaker)
Workshop of the EURO Working Group on Vehicle Routing and Logistics optimization (VeRoLog), Seville/Spain
5 Jun 2019

Kreuzmodale Korrespondenzen zwischen Farbe, Duft und Textur am Beispiel einer Körpercreme

Udo Wagner (Invited speaker)
Forschungsseminar, Berlin/Germany
5 Jun 2019

Robust risk aggregation with neural networks

Mathias Pohl (Speaker)
SIAM Conference for Financial Mathematics and Engineering 2019, Toronto/Canada
5 Jun 2019

Cooperation in a company: A large-scale experiment

Martin Kocher (Speaker)
16th International Conference on Social Dilemmas,
Hongkong/China
6 Jun 2019

Determinants of Franchisee Overall Satisfaction:

Application of the Performance Feedback Theory

Josef Windsperger (Speaker), Michael Jirasek (Speaker),
Susanne Maria Gaffke (Speaker)
33rd Annual International Society of Franchising Conference,
Vienna/Austria
6 Jun 2019

Statistical inference with F-statistics when fitting simple models to high-dimensional data

Hannes Leeb (Invited speaker)
10th Workshop on New Developments in Econometrics and Time Series, Graz, Austria
6 Jun 2019

On Autocorrelation Robust Tests and Testing for Trend

Benedikt Pötscher (Invited speaker)
New Developments in Econometrics and Time Series,
Graz/Austria
6 Jun 2019 - 7 Jun 2019

Ownership Structure of Franchise Chains:

Trade-off between Adaptation and Control

Matthias Glaser (Speaker)
33rd Annual ISoF Conference, Vienna/Austria
6 Jun 2019 - 8 Jun 2019

Arbeit neu denken – Cooperative Lösungsansätze für eine Ökonomie der Zukunft

Sabine Neuhofer (Invited speaker)
Arbeit neu denken – Cooperative Lösungsansätze für eine Ökonomie der Zukunft,
Vienna/Austria
7 Jun 2019

Vertical Bargaining and Obfuscation

Edona Reshidi (Speaker)
10th Annual Consumer Search and Switching Costs Workshop,
Los Angeles/United States
7 Jun 2019 - 8 Jun 2019

Building trust: The costs and benefits of gradualism

Wieland Müller (Speaker)
National Research University, Moscow/Russian Federation
11 Jun 2019

Kommentar zum ZaDiG 2018

Martin Miernicki (Speaker)
Seminarreihe "Kapitalmarktrecht für Young Professionals",
Vienna/Austria
11 Jun 2019

Can fairness concerns be mitigated with efficient contracting in collaborative platforms?

Aysegül Engin (Speaker)
19th International Conference on Group Decision and Negotiation, GDN 2019, Loughborough/United Kingdom
11 Jun 2019 - 15 Jun 2019

Role of feedback on bidding behavior in electronic first price reverse auctions

Aysegül Engin (Speaker)
19th International Conference on Group Decision and Negotiation, GDN 2019, Loughborough/United Kingdom
11 Jun 2019 - 15 Jun 2019

Collaborative Transportation Mechanisms:

A Request Exchange Approach

Daniel Alejandro Nicola Naranjo (Speaker)
19th International Conference on Group Decision and Negotiation, GDN 2019, Loughborough/United Kingdom
12 Jun 2019

Quasi-dark trading: The effects of banning dark pools in a world of many alternatives

Thomas Johann (Contributor), Talis Putnins (Contributor),
Satchit Sagade (Speaker), Christian Westheide (Contributor)
FMA European Conference, Glasgow/United Kingdom
12 Jun 2019 - 14 Jun 2019

Bank Resolution Regimes: Risk-Shifting and Resolution Efficiency

Gyöngyi Lóranth (Speaker)
Humboldt-Universität zu Berlin, Germany
13 Jun 2019

Causal Effects of Schooling on Political Preferences. Experimental Evidence.

Dominik Stelzeneder (Speaker)
VCEE Away Day, Reichenau an der Rax/Austria
13 Jun 2019

Panel Open Access

Thomas Gehrig (Invited speaker)
VHB Jahrestagung 2019, Rostock/Germany
13 Jun 2019

Peer Effects and Social Closeness

Georg Sator (Speaker)
VCEE Away Day, Reichenau an der Rax/Austria
13 Jun 2019

Primal-Dual Forward-Backward Methods for PDE-constrained Optimization Problems

Teresa Scarinci (Speaker)
Conference Large-Scale Scientific Computations, LSSC'19,
Sozopol/Bulgaria

Research Visits and Collaborations

(min. 5 days)

Babeş-Bolyai University

Josef Windsperger (Visiting researcher)
6 Jan 2019 - 10 Jan 2019

University of Toronto

Edona Reshidi (Visiting researcher)
1 Feb 2019 - 30 Apr 2019

GATE Lyon St-Etienne

Stephanos Vlachos (Visiting researcher)
4 Feb 2019 - 1 Mar 2019

European Securities and Markets Authority (ESMA)

Christian Westheide (Visiting researcher)
5 Feb 2019 - 1 Mar 2019

Université Paris I – Panthéon-Sorbonne

Jean-Robert Tyran (Visiting researcher)
18 Feb 2019 - 1 Mar 2019

Princeton University

Martin Glanzer (Visiting researcher)
11 Mar 2019 - 15 Mar 2019

IESEG School of Management

Christina Sichtmann (Visiting lecturer)
24 Mar 2019 - 28 Mar 2019

The University of Chicago

Martin Glanzer (Visiting researcher)
25 Mar 2019 - 9 Jun 2019

Waseda University

Markus Reitzig (Visiting researcher)
26 Apr 2019 - 01 May 2019

California Institute of Technology (Caltech)

Jean-Robert Tyran (Visiting researcher)
29 Apr 2019 - 9 May 2019

Università degli Studi di Bergamo

Georg Pflug (Visiting researcher)
3 Jun 2019 - 16 Jun 2019

Université Paris XIII

Immanuel Bomze (Visiting researcher)
10 Jul 2019 - 14 Jul 2019

New York University

Karl Schlag (Visiting researcher)
1 Sep 2019 - 24 Oct 2019

Cornell University

Christian Schmid (Visiting researcher)
11 Sep 2019 - 4 Oct 2019

Columbia University in the City of New York

Christian Schmid (Visiting researcher)
4 Oct 2019 - 31 Oct 2019

Technische Universität Bergakademie Freiberg

Martin Altenburger (Visiting researcher)
14 Oct 2019 - 25 Oct 2019

University of New South Wales

Karl Schlag (Visiting researcher)
1 Nov 2019 - 9 Jan 2020

Helsinki Center of Economic Research

Thomas Gehrig (Visiting researcher)
6 Dec 2019 - 13 Dec 2019

Helsinki Center of Economic Research

Thomas Gehrig (Visiting researcher)
7 Dec 2019 - 14 Dec 2019

Workshops and Conferences

12th Freiburg-Wien-Zürich Seminar

Christa Cuchiero (Organiser), Irene Klein (Organiser),
Thorsten Schmidt (Organiser), Josef Teichmann (Organiser)
15 Jan 2019 - 16 Jan 2019

OLA International Conference on Optimization and Learning

Frank Benda (Participant)
29 Jan 2019 - 31 Jan 2019

Tagung des Bildungsökonomischen Ausschusses

Oliver Fabel (Participant)
8 Mar 2019 - 10 Mar 2019

VHB-Arbeitstagung Blockchain – Anwendungspotentiale und Herausforderungen

Thomas Gehrig (Participant)
8 Mar 2019

22nd Colloquium on Personnel Economics 2019

Oliver Fabel (Organiser)
13 Mar 2019 - 15 Mar 2019

VBEN Vienna Behavioral Economics Network

Jean-Robert Tyran (Organiser), Marie Claire Villeval (Participant)
19 Mar 2019

ÖFG-Konferenz: Nach der Krise ist Vor der Krise

Thomas Gehrig (Organiser)
11 Apr 2019 - 12 Apr 2019

ÖFG-Konferenz: Nach der Krise ist Vor der Krise

Thomas Gehrig (Organiser), Matthias Bank (Organiser),
Christian Laux (Organiser), Reinhard Neck (Organiser),
Alfred Wagenhofer (Organiser), Claudia Wöhle (Organiser)
18 Apr 2019

Forum Produktion und Management

David Schmaranzer (Participant)
25 Apr 2019

VBEN Vienna Behavioral Economics Network

Jean-Robert Tyran (Organiser), Klaus Wertenbroch (Participant)
22 May 2019

3rd International Workshop on Arc Routing Problem

Georg Erwin Adrian Fröhlich (Participant)
27 May 2019 - 29 May 2019

Tagung "Arbeit neu denken"

Oliver Fabel (Organiser)
7 Jun 2019

19th International Conference on Group Decision and Negotiation, GDN 2019

Rudolf Vetschera (Organiser)
11 Jun 2019 - 15 Jun 2019

VHB Jahrestagung 2019

Thomas Gehrig (Participant)
12 Jun 2019 - 14 Jun 2019

Advances in Decision Analysis 2019

Steffen Keck (Participant)
19 Jun 2019 - 21 Jun 2019

The Vienna Conference on Strategy, Organizational Design, and Innovation

Markus Reitzig (Organiser), Valentina Richter (Participant)
21 Jun 2019 - 23 Jun 2019

Annual Meeting of the Academy of International Business (AIB 2019)

Christina Sichtmann (Organiser)
24 Jun 2019

Annual Meeting of the Academy of International Business (AIB 2019)

Christina Sichtmann (Presenter)
26 Jun 2019

Gesellschaftsräume der Literatur

Schlomo Hofmeister (Panellist), Marie-Claire Sowinetz
(Panellist), Friedrun Huemer (Panellist), Bernhard Kittel
(Panellist), Christa Zöchling (Presenter), Lydia Mischkulnig
(Presenter)
26 Jun 2019

Workshop on International Economic Networks (WIEN)

Alejandro Cunat (Organiser)
27 Jun 2019 - 28 Jun 2019

NBER Summer Institute

Alejandro Cunat (Participant)
10 Jul 2019 - 12 Jul 2019

European Summer Symposium in Financial Markets 2019

Thomas Gehrig (Participant)
14 Jul 2019 - 21 Jul 2019

7th INFORMS Transportation Science and Logistics Society Workshop

Karl Franz Dörner (Organiser)
15 Jul 2019 - 18 Jul 2019

7th INFORMS Transportation Science and Logistics Society Workshop

Frank Benda (Participant)
15 Jul 2019 - 18 Jul 2019

7th INFORMS Transportation Science and Logistics Society Workshop

David Schmaranzer (Participant)
15 Jul 2019 - 18 Jul 2019

World Finance Conference 2019 (Santiago de Chile)

Thomas Gehrig (Advisor)
24 Jul 2019 - 26 Jul 2019

XV International Conference on Stochastic Programming

Martin Glanzer (Participant)
29 Jul 2019 - 2 Aug 2019

Academy of Management Annual Conference

Markus Reitzig (Participant)
9 Aug 2019 - 13 Aug 2019

Academy of Management Annual Conference

Steffen Keck (Participant)
13 Aug 2019

3rd SAFE Market Microstructure Conference

Christian Westheide (Organiser)
19 Aug 2019 - 20 Aug 2019

2019 EFA Doctoral Tutorial (Carcavelos)

Gyöngyi Loranth (Participant)
21 Aug 2019

46th Annual Meeting of the European Finance Association 2019

Thomas Gehrig (Advisor)
22 Aug 2019

Tagung der Vertrauensdozenten der Konrad-Adenauer-Stiftung

Christina Sichtmann (Participant)
29 Aug 2019 - 1 Sep 2019

46th Annual Conference of the European Association for Research in Industrial Economics

Philipp Schmidt-Dengler (Participant)
30 Aug 2019 - 1 Sep 2019

10th International Workshop on Simulation and Statistics

Nicolai Amann (Participant)
2 Sep 2019 - 6 Sep 2019

Operations Research 2019: Annual scientific conference of the national Operations Research Societies of Germany, Austria and Switzerland

Roland Braune (Stream Organiser), Karl Franz Dörner (Stream Organiser), Andrea Gaunersdorfer (Stream Organiser), Walter Gutjahr (Stream Organiser), Georg Pflug (Stream Organiser), Andrea Seidl (Stream Organiser)
3 Sep 2019 - 6 Sep 2019

PhD-Workshop: Scientific Paper Writing in Management and Economics

Josef Windsperger (Organiser), Christina Pawlowitsch (Contributor)
9 Sep 2019 - 13 Sep 2019

Vienna Congress on Mathematical Finance 2019

Mathias Beiglböck (Organiser), Rüdiger Frey (Organiser), Stefan Gerhold (Organiser), Friedrich Hubalek (Organiser), Irene Klein (Organiser), Thorsten Rheinländer (Organiser), Birgit Rudloff (Organiser), Walter Schachermayer (Organiser), Uwe Schmock (Organiser)
9 Sep 2019 - 11 Sep 2019

VBEN Vienna Behavioral Economics Network

Jean-Robert Tyran (Organiser), Leonardo Bursztyrn (Participant)
10 Sep 2019

Landesseminar der Konrad-Adenauer-Stiftung für Stipendiaten aus Österreich

Christina Sichtmann (Panel chair)
24 Sep 2019 - 29 Sep 2019

Digital Societies

Hermann Helke (Participant)
25 Sep 2019 - 27 Sep 2019

26th Annual Meeting of the German Finance Association (DGF) 2019

Thomas Gehrig (Advisor)
26 Sep 2019 - 28 Sep 2019

50 Jahre Seminar für Ökonometrie an der Universität Frankfurt

Thomas Gehrig (Participant)
7 Oct 2019

24th Young Statisticians Meeting

Nicolai Amann (Participant)
18 Oct - 20 Oct 2019

Symposium Kryptowährungen und virtuelle Finanzierungsformen: Kundenbindungs- und Punkteprogramme

Martin Miernicki (Organiser), Arthur Weilingner (Participant)
22 Oct 2019

Statistiktage 2019 der "Österreichische Statistische Gesellschaft" (ÖSG)

Nicolai Amann (Participant)
24 Oct - 25 Oct 2019

Meeting of the Working Group Operations Research in Health Care and Disaster Management of the Austrian Society of Operations Research (ÖGOR)

Marion Rauner (Participant), Margit Sommersguter-Reichmann (Participant), Walter Gutjahr (Participant), Tina Wakolbinger (Participant)
25 Oct 2019

International Workshop on Digitalization and Servitization within Factory-Free Economy

Christine Strauss (Participant)
4 Nov 2019 - 7 Nov 2019

Berlin Lunchtime Meeting: Bedarfsgerechtigkeit oder bedingungsloses Grundeinkommen – Wie können Verteilungskonflikte künftig gelöst werden?
Bernhard Kittel (Panellist)
6 Nov 2019

Podiumsdiskussion "Migration und Beschäftigung", Altkalksburger Vereinigung
Bernhard Kittel (Panellist)
11 Nov 2019

1. Österreichischer Vereinsrechtstag
Martin Miernicki (Organiser), Arthur Weilingner (Organiser)
19 Nov 2019

Data & Ethics
Thomas Gehrig (Organiser), Kyle Hubbard (Organiser), Maria Chiara Iannino (Organiser), Stephan Unger (Organiser)
22 Nov 2019 - 23 Nov 2019

Compromise, Don't Optimize: A Prior-Free Alternative to Perfect Bayesian Equilibrium
Karl Schlag (Participant)
2 Dec 2019

ESRB ASC Workshop on Stress Testing
Thomas Gehrig (Advisor)
6 Dec 2019

Econometric Society Winter Meeting 2019
Philipp Schmidt-Dengler (Participant)
15 Dec 2019 - 17 Dec 2019

World Finance & Banking Symposium (New Delhi)
Thomas Gehrig (Advisor)
19 Dec 2019 - 21 Dec 2019

International Workshop on Digital Content & Smart Multimedia
Christine Strauss (Organiser)
23 Dec 2019 - 25 Dec 2019

Seminar Series

Our seminar series are platforms to discuss recent and ongoing research. The exchange of ideas takes place in a more or less informal atmosphere. A brown-bag seminar is more informal and ideal to discuss new ideas and work in progress while senior researchers tend to present polished papers in a departmental seminar. Our seminar series are organized and funded by our departments and centers.

Vienna Joint Economic Seminar

[On the family origins of human capital formation:](#)

[Evidence from donor-conceived children](#)

Erik Plug (Amsterdam University)

10 Jan 2019

Citation-Based Ranking

This table provides a citation analysis for our tenured faculty ($n = 30$)¹ based on Thompson Reuters Web of Science (WoS). This database is used by the quality assurance unit of the university as well. The top section of the table shows the total number of citations and Hirsch indexes according to Web of Science as of January 2020. The lower section of the table gives the names of the Faculty members who rank first according these metrics. In case of Faculty members achieving the same scores, we rank those in ascending order by age.

Citations-based measures of research Impact (Web of Science)

Distribution of citations	Total number of citations		Hirsch Index h	
	Number of citations	Percentage of Faculty members	h -index	Percentage of Faculty members
	0-50	0%	0-2	0%
	51-100	3%	3-5	16%
	101-300	23%	6-10	17%
	301-500	10%	11-15	27%
	501-1000	30%	16-20	17%
	> 1000	34%	> 20	23%
Ranking of individuals	Diamantopolous, A.		Diamantopolous, A.	
	Hartl, R.		Hartl, R.	
	Dörner, K. F.		Dörner, K. F.	
	Kocher, M.		Bomze, I.	
	Bomze, I.		Kocher, M.
